IT Networking & Infrastructure

Hands-on technical training in computer networking — from fundamentals to configuration and troubleshooting.

In-house or venue of your choice | Flexible duration | Certificate of participation | Course report

PROGRAMME OVERVIEW

Participants build, configure and troubleshoot networks using real equipment and simulators. Modules can follow the Cisco CCNA curriculum, wireless networking (e.g. TP-Link Omada) or your organisation's infrastructure needs.

TOPICS / MODULES

- Computer Networking Fundamentals
- Network Setup & Configuration
- Wireless Networking & Access Point Controllers
- Network Security Fundamentals
- IT Infrastructure Management
- System Troubleshooting

LEARNING OUTCOMES

- Configure switches, routers and access points with confidence
- Design secure small-to-medium networks
- Diagnose and fix network problems systematically

SUITABLE FOR

IT professionals, technicians, vocational training officers and students pursuing a networking career.

TRAINER

Ts. Dr. Wan Muhammad Hazwan Ahmad Azamud-Din

Head of Electrical Department, ILP Tangkak
Professional Technologist (IT), MBOT · H3C Certified Technical Instructor · CCNA ITQ Instructor since 2010
